

Are you paying too much for old-fashioned phone service?

Many businesses pay more than they need to for phone service - simply because they aren't aware that there are better options. Ask yourself these questions:

- Do you need advanced features - such as intelligent call routing, find me / follow-me call forwarding, and voicemail-to-email forwarding but think you can't afford them?
- Does your business have multiple offices with separate phone systems - and phone bills - at each?
- Are you paying too much for long distance calls?
- Would you like to cut your monthly phone costs?

We Can Help!

We are dealers for Star2Star, an innovative, award-winning Voice over Internet Protocol (VoIP) communications system. VoIP is the future of the telephone industry. It connects calls using your broadband Internet connection, rather than expensive copper phone lines. Star2Star's patent-pending VoIP technology delivers quality, reliability, and features that are equal to any phone system - at a fraction of the price.

How Can We Reduce Your Phone Bill?

We save our customers money in several ways, including free calling between branch offices, reduced monthly charges for phone lines, unlimited local calling, bundled long distance calling, and low-cost 800 numbers. In addition, our service includes complete business continuity protection and 24 / 7 / 365 management and monitoring of your telephone system and service - all while saving you money!

Are You Ready?

We can show you how to reduce your phone bill and upgrade your phone system, typically for less than you currently pay for your phone bill alone.
